

Name: _____

Self-Evaluation Form

Learning Objectives;	I have this skill mastered.	I need more practice.
I can describe the particles in a solid.		
I can describe the two types of solids: crystalline solids and amorphous solids.		
I can describe the particles in a liquid.		
I can describe two properties of liquids: surface tension and viscosity.		
I can describe the particles of a gas.		
I can describe the changes in state between solids, liquids and gases as freezing, melting, and vaporization.		
I can define evaporation and give examples.		
I can define boiling and give examples.		
I can define sublimation and give examples.		
I can define condensation and give examples		
I can describe and illustrate Boyle's law.		
I can describe and illustrate Charles's law.		

My areas of strength are:

My areas of weakness are:

To prepare for the unit test I will:
